Lucid Computing
U.S. Policy Team
Washington, D.C.

Dear Selection Committee,

I am writing to express my strong interest in the U.S. Policy Associate position at Lucid Computing. Lucid is built on the premise that trust in frontier AI should rest on proof, not promises. That idea speaks to the question that has run through all of my policy work: how a government can govern a technology it cannot yet see inside. I would be excited to help build Lucid's Washington presence at the moment legislators are deciding what verification they can realistically ask for.

At Holland & Knight, I learned that the hardest part of emerging-technology policy is not tracking what changed. It is explaining why a change matters to someone with five minutes and no technical background. When I prepare briefings for practice group leaders and former Members of Congress, I start with the decision the reader faces and work backward, testing every technical claim with the attorneys who know the subject best before it reaches the page. My time in Representative DeGette's office showed me the other side of that exchange: staff rarely lack opinions, but they often lack a trustworthy, plain-language explanation of what is technically possible. Lucid's goal of making sure a good answer already exists when a staffer asks is the gap I watched offices struggle to fill.

I also like building systems where none exist. When I co-founded Georgetown's Women in Law Club and Undergraduate Law Journal, there was no editorial process, no tracking, and no institutional memory, so I created them, and they now outlast any single semester. I would bring the same instinct to owning Lucid's stakeholder-engagement record and its standard materials, so every meeting builds on the last. I do not yet read verification papers unaided, but my work has repeatedly required me to become fluent in unfamiliar technical domains quickly, and I know how to ask the questions that keep me accurate.

I would be excited to grow alongside a small team working on one of the most consequential governance problems of this decade. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to Lucid's U.S. policy work.

Sincerely,
Adeline Bean
