Oklo
Environmental Compliance Team
Remote

Dear Selection Committee,

I am writing to express my strong interest in the Environmental Policy & Compliance Analyst position at Oklo. Advanced fission may be one of the most important tools for meeting growing electricity demand with clean, reliable power. Whether it arrives in time depends heavily on how well companies navigate environmental review. I am drawn to Oklo because this role sits exactly where policy meets deployment: making sure the analysis is rigorous, the documentation is clear, and regulators have what they need to say yes.

At Holland & Knight, I learned to treat statutes, regulations, and agency guidance as documents with consequences, not abstractions. My approach is to start with the primary source, identify exactly which obligations apply and when, and then explain the implications in language a decision-maker can act on. I have also learned how much depends on precision. A misread provision or an imprecise summary can cost a client months. In Representative DeGette's office, casework on regional energy access and environmental concerns showed me how environmental questions look to the communities affected, and why careful, transparent analysis matters for public trust.

Writing well is central to this role, and it is the skill I have worked hardest to build. Co-authoring published client alerts with partners taught me to write in a clear, active voice under deadline and to defend every sentence. Leading the editorial process for Georgetown's Undergraduate Law Journal trained me to catch the inconsistencies that weaken a document before anyone else sees them. NEPA practice and NRC and DOE processes would be new to me. I am eager to learn them in depth, and I am comfortable in a startup environment where I own a deliverable from first research through final draft.

I would be proud to help move Oklo's powerhouses through environmental review and into operation. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to your environmental compliance team.

Sincerely,
Adeline Bean
