Palantir Technologies
Deployment Strategist, New Grad – Warp Speed
New York, New York

Dear Selection Committee,

I am writing to express my strong interest in the Deployment Strategist, New Grad – Warp Speed position at Palantir Technologies. Through my policy work I have come to believe that America's industrial base is a national security question, and that the bottleneck is often not will or funding but the ability to see and act on what is happening on the factory floor. Warp Speed's focus on giving manufacturers that visibility is why this team, specifically, excites me.

At Holland & Knight, researching critical supply chains alongside the co-leads of the firm's National Security & Defense industry sector group showed me how fragile production capacity can be, and how rarely the people writing policy can see the operational data that would sharpen it. The skill I have developed most is the one this role describes: taking disconnected streams of information and building a coherent account of what the real problem is. When I brief practice group leaders and former Members of Congress, I am rarely summarizing. I am deciding what matters and defending why.

The part of the role I find most compelling is user empathy. As a casework intern at the International Rescue Committee, I learned that the official description of a system and how people actually experience it are often very different, and that you only find the gap by sitting with the person trying to use it. I would bring that instinct to customer sites. Programming is the area where I have the most to learn, and I would approach it the way I have approached every unfamiliar policy domain: deliberately and quickly, with the humility to ask engineers the right questions.

I would be excited to begin my career immersed in manufacturers' hardest problems. Thank you for your time and consideration. I look forward to the opportunity to discuss my application.

Sincerely,
Adeline Bean
