CoreWeave
Legal and Government Affairs, U.S. Public Policy
Washington, D.C.

Dear Selection Committee,

I am writing to express my strong interest in the Policy Analyst, U.S. Public Policy position at CoreWeave. The next phase of American AI leadership will be decided as much in state utility commissions, county permitting offices, and congressional committees as in research labs. Questions about power, siting, incentives, and national security now shape where compute can be built and how fast. I want to work on that problem from inside a company building the infrastructure, and CoreWeave's Washington team sits exactly where those threads meet.

At Holland & Knight, my work spans emerging technology, energy and critical infrastructure, supply chains, and national security, and I have learned that these are rarely separate conversations. A federal AI proposal in the morning can turn into a state energy question by the afternoon, which is the range this role describes. My approach is to read the primary text first, identify what actually changes for an operator, and then write the shortest explanation that lets a senior reader act. Briefing practice group leaders and former Members of Congress has taught me that a recommendation is only as credible as its weakest factual claim, so I check technical points with the people who know them best before they reach the page.

I am especially drawn to the community side of this work. Casework on regional energy access and environmental concerns in Representative DeGette's office showed me how infrastructure decisions feel to the people who live near them, and why early, honest engagement matters. Following state legislation at the National Endowment for Financial Education taught me how differently state legislatures move. I know this posting asks for more years of experience than I have, but I learn new policy domains quickly and I am comfortable owning a workstream end to end.

I would be excited to help CoreWeave shape the policies that determine how the country builds AI infrastructure. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to your U.S. Public Policy team.

Sincerely,
Adeline Bean
