Pivot Energy
Revenue Operations
Denver, CO

Dear Selection Committee,

I am writing to express my strong interest in the Associate, Market Operations position at Pivot Energy. Community solar is one of the most direct ways clean energy policy reaches households and businesses, and its success depends on the operational work of managing subscriptions, following each program's rules, and making sure customers receive the credits they were promised. I am excited by a role that connects state energy programs, utilities, and customers, and that would let me grow with a company building distributed energy at scale.

At Holland & Knight, I follow energy, utility, and infrastructure developments at the federal and state levels and write memos explaining what new rules and programs mean in practice. I have learned to read program requirements carefully, notice when a deadline or obligation changes, and communicate it clearly to the people who need to act. I also keep trackers for recurring deliverables across several attorneys, which has made me organized and dependable with monthly cycles and detail-heavy work. My time in Representative DeGette's office, where I researched energy and environment legislation for a Colorado member, deepened my interest in Colorado's clean energy landscape.

The billing and customer side of this role feels familiar. At Georgetown's student-run credit union, I process transactions, reconcile my work to the cent, and follow written procedures and consumer protection controls. Explaining account details to members every day has taught me how to resolve issues calmly and escalate problems with a proposed solution rather than just a complaint. My economics coursework gave me comfort working with numbers, and I enjoy finding ways to make a recurring process simpler and more accurate. I also use AI and spreadsheet tools to review data efficiently, always validating results before sharing them.

I would be excited to manage subscriptions and utility relationships, ensure program compliance, review monthly data and revenue reports, support invoicing, and help improve Pivot's standard operating procedures. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to your team.

Sincerely,
Adeline Bean
