Oklo
Environmental Compliance Team
Remote

Dear Selection Committee,

I am writing to express my strong interest in the Environmental Policy & Compliance Analyst position at Oklo. As a Georgetown University senior with experience in policy research, regulatory analysis, and strategic communications, I am drawn to the hard, consequential work of getting new clean energy through a demanding regulatory process. Oklo's mission to make advanced fission a reality, and this role's focus on rigorous environmental analysis and clear regulatory writing, are why I am excited to apply.

As a Public Policy and Regulation Intern at Holland & Knight LLP, I have written more than 50 research memos on legislative and regulatory developments across energy, critical supply chains, national security, and financial services. The work requires me to read statutes, regulations, and agency guidance closely, evaluate what proposed legislation and agency actions mean for the businesses affected, and present the conclusions clearly to practice group leaders and former Members of Congress in weekly briefings. As a Legislative Intern for Representative Diana DeGette, I handled constituent casework on regional energy access and environmental concerns, working with federal agencies to resolve questions, and researched energy and appropriations legislation.

Writing is at the center of my work. Co-authoring published client alerts with Holland & Knight partners taught me to produce accurate, active-voice regulatory analysis on deadline, and to catch the inconsistencies that undermine a document. As Executive Editor of Georgetown's Undergraduate Law Journal, which I co-founded, I oversee review and citation checking for every submission, so detail-oriented quality control is a habit. I am eager to learn NEPA practice and NRC and DOE processes in depth, and I am comfortable in fast-moving, low-precedent environments where I take ownership of a deliverable from research through final draft.

I would be proud to help bring Oklo's powerhouses through environmental review and into operation. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to your environmental compliance team.

Sincerely,
Adeline Bean
