Bipartisan Policy Center
Energy Program
Washington, D.C.

Dear Selection Committee,

I am writing to express my strong interest in the Policy Analyst position with the Bipartisan Policy Center's Energy Program. I believe the energy transition will only last if it is built on policies both parties can support, and BPC's record of turning bipartisan ideas into enacted legislation is the model of policy work I most admire. The Energy Program's focus on keeping energy reliable, affordable, and clean, from electricity and permitting to AI and energy, covers exactly the questions I want to spend my career on.

My interest in energy policy grew from both sides of the policymaking process. In Representative DeGette's office, I handled casework on regional energy access and environmental concerns and saw how energy decisions made in Washington reach families in Colorado. At Holland & Knight, my research spans energy and critical infrastructure alongside technology and national security, and I have come to appreciate how often these topics now converge. I approach each assignment by reading the primary sources closely, understanding what each stakeholder actually needs, and writing the clearest possible explanation for a busy reader.

BPC's model also depends on trust across the aisle, and that is something I have tried to practice. Briefing practice group leaders and former Members of Congress from both parties has taught me to present facts fairly and to let the analysis speak for itself. I enjoy the variety this role describes: drafting briefs and fact sheets, supporting convenings, helping with communications, and assisting with grant materials. As a co-founder and treasurer of two student organizations, I have planned events, managed budgets, and edited demanding written work, and I would bring that same reliability to the Energy team.

I would be honored to support BPC's efforts to build durable, pragmatic energy policy and to learn from the experts and political leaders who drive its work. Thank you for your time and consideration. I look forward to the opportunity to discuss how I could contribute to the Energy Program.

Sincerely,
Adeline Bean
